

INSTRUCTIONS

Using the joining clips supplied, attach all pieces together in pairs (Fig A.). Then join pairs together to cover the area of pond required (Fig B.) prior to placing on pond.

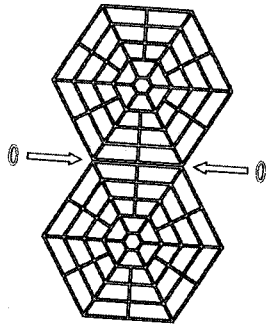

Fig A.

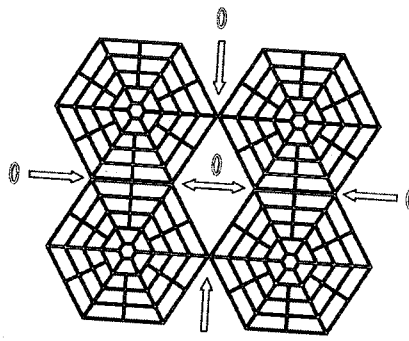

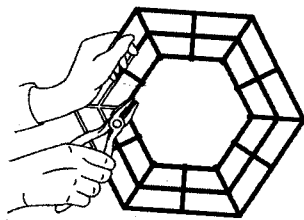

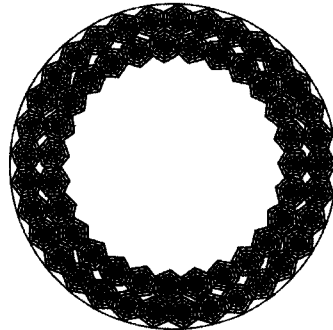

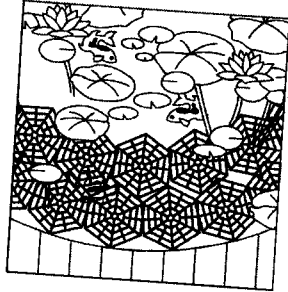

Fig B.

NOTE: Can be cut with secateurs or strong scissors to allow for plants and other obstacles.

How to calculate no. of pieces required:

Run a length of string or pipe around the circumference of the pond and measure the length you require. Predators such as herons and cats only strike at the edge, so it is not necessary to cover the whole pond.
